Lighten your bikes

Ritchey present extreme lightweight MTB Fork!

WCS Carbon Mountain Fork – Disc only

The one-piece monocoque construction ensures the forks uniformed structure integrity. Full carbon dropouts and one-piece carbon disc brake tabs minimize overall fork weight. Collectively, these features produce a fork that's strong and extremely light and which will inspire confidence while you wind your tail along the trails. Version with disc mount and cantilever bosses for rim brakes also available (510g.)

Designed for frames with 80mm fork travel

Weight: 465g.

MSRP 519,90 €

Best regards
